Forecast for Friday 03 Feb 2023

Weather: A mainly dry start but increasing amounts of low cloud push up from the southwest by mid-morning, accompanied by patchy light rain or drizzle. This clearing to the northeast by late afternoon to allow some sunny or clear breaks.

Chance of cloud-free hill tops above 800m: 90% at first, decreasing to 20% by mid-morning, increasing to 60% by evening.

Low Cloud and visibility: Good at first but extensive low cloud leading to hill fog by late morning, cloud breaking up during the afternoon, leaving scattered low cloud and isolated hill fog.

Met Office Aberdeen Meteorologist's View
Feeling very cold at height despite the milder temperatures in the glens, with very strong winds at first. Due to a technical error the wind/temperature details can currently only be viewed in the printable pdf version of this forecast.

Forecast for Saturday 04 Feb 2023

Weather: Patchy low cloud at first, increasing by mid-morning, with outbreaks of rain following behind. Potential for some sleet and snow on the back edge of the front. This clearing late afternoon to sunny spells and scattered wintry showers. Showers easing into the evening.

Maximum wind: Southwest 20-25 mph gusting 30-35 mph becoming westerly and decreasing later.

Chance of cloud-free hill tops above 800m: 40% at first, decreasing to 20% by mid-morning, 80% by late afternoon.

Low Cloud and visibility: Scattered low cloud leading to hill fog at first, becoming extensive on the front. Isolated low cloud and moderate or poor visibility in showers.

Temperature: **Glens:** Plus 9 falling to plus 6 Celsius.
At 800m: Plus 2 falling to minus 3 Celsius.
Freezing level: 1400m falling to 600m into the evening.
